

Inground Pool Liners

for a lower maintenance pool

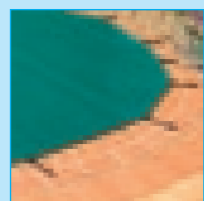

The Company

ABGAL Liners & Covers is a family business that has been manufacturing high quality products for Australians and the world since 1976. Products include above and inground pool liners, pool covers and solar blankets, tank liners and covers, dam liners and covers and large vinyl membranes. The ultra-modern operations facility is an impressive 6,600m² at Crestmead, Queensland and supplies over 24,000 liners and covers per year.

Sophisticated technologies have been adopted in areas of computer design, robotic cutting and automotive systems which allows us to complete the manufacture of **all sizes and shapes** of liners and covers, **custom-designed to fit beautifully**. ABGAL liners are unique because they are 'wedge-welded'. This process produces a **stronger welded join and eliminates the unsightly excess material** that hangs out past the weld, as seen on many other liners. It also **stops pool cleaners getting caught** during their cleaning cycle. When the pool and water are clean, the wedge-welding advantage is that the **welds are nearly invisible**.

ABGAL were the first liner manufacturer in Australia to progress from manual design and cutting through to a unique 3D design computer program and manufacture (CAD/CAM) system. A unique blend of quality, service and commitment to excellence has led ABGAL to become Australia's largest manufacturer of pool liners and covers, and recognised market leaders within their many fields of expertise. We take great care to ensure that all unused vinyl material is reserved and recycled to produce other quality products. Accredited to quality assurance ISO 9001, ABGAL's success today is attributed to the high emphasis placed on the quality of service and products on offer.

Water Saving Pool Covers

A pool cover will reduce water loss through evaporation by up to 95% plus reduce chemical consumption by 50%. A pool cover will also stop fallen leaves swamping

and rotting on the pool floor. For an ABGAL fitted pool cover or solar blanket visit our website www.abgal.com.au to find your closest stockist.

Packaging

ABGAL's products are important to us and because we want to ensure that our liners arrive in the best possible condition we individually pack each liner in its own protective carton which is glued not stapled.

Support

At ABGAL, we pride ourselves on our honesty, friendliness and professionalism. We take our customers and products very seriously and we are consistently striving for higher standards of excellence. Contact us on 1800 077 533, or to view our full range of products and services, visit our website on www.abgal.com.au.

Refurbish your old inground pool from this...

...to this!

When you are planning a new pool or refurbishing an old pool, one of the most important decisions you'll make involves the choice of interior finish.

You want your pool to look good – but it must feel good and be easy to maintain too. Today, one of the most popular interior finishes is vinyl. Why? Because ABGAL's vinyl pool liners provide more real benefits than any other.

Unlike other pool interiors, ABGAL's satin-smooth vinyl is soft to touch and is as thick as 15 layers of paint, so it's durable too. This means it will outlast other finishes – in fact it's been known to last up to 20 years. Manufactured in Australia for Australasian conditions, ABGAL's vinyl pool liner won't chip, crack or flake and is protected against harmful chemicals and UV rays. And because it is treated to resist algae and bacterial growth, pool owners will find it easier to keep their pool hygienically clean for the health of the whole family.

ABGAL's vinyl liners are easy to install with specifically designed, liner fixing extrusions, which are non-obtrusive, low profile and made from quality PVC. These extrusions will flex around corners and are used to secure the liner around tile borders, steps, skimmer mouths and other pool fixtures – even under water! Once the liner is installed, it is vacuum-sealed to ensure it forms a smooth skin across the pool surface, prior to being filled with water.

New Inground Pools

An ABGAL satin-smooth vinyl liner is the ideal choice for your new inground pool. It is super-tough and durable and can be applied to any size or shaped pool. Each liner is quality inspected before it is packed to ensure it meets our strict standards and is backed by a 10 year warranty.

Refurbish Cracked or Leaking Pools

Long periods of either dry or wet weather conditions bring ground movement which may cause many pool surfaces to crack. ABGAL's durable vinyl pool finish is the fast, cost-effective solution to repetitive, costly repairs and is suited to all pool finishes.

Installation

ABGAL liners are generally fitted and finished by recognised liner installation professionals. These professionals will carefully measure your pool and provide us with all the necessary details. Using advanced computer design systems, ABGAL will custom-design and manufacture your liner to fit beautifully.

ABGAL's satin-smooth vinyl finish is easy to care for, our liners are Australian-made and will transform your pool interior into an attractive, low maintenance finish.

Why Choose a Vinyl Liner?

- Flexible – can be applied to any shape or sized pool.
- Range – comes in a choice of designer patterns and colours.
- Smooth – non-abrasive surface so it won't harm your skin.
- Tough – formulated to endure Australia's harsh climate.
- Treated – resists algae, bacteria & fungus. UV protected.
- Durable – ideal for new or refurbishing tired old pools.
- Custom-made – to fit your pool beautifully.
- Warranty – guaranteed for 10 years.

Outstanding Benefits
